Cataracts 30-SEC PSA August 2017

Did you know that cataracts are the most common eye disease?

They are responsible for more than 50 percent of world blindness, and affect more than 25 million Americans. The good news is that corrective surgery results in improved vision in 90 percent of cases.

If you haven't been to your eye doctor within the past two years, make an appointment for your dilated eye exam today. Visit alabama-public-health-dot-gov for more information!
